

Star Wars, Tech Gifts, & the Technology Frontier!

Greetings!

Normally, we are covering the biggest technology issues of the day with you in this newsletter. This month, we have caught a whimsical bug and have decided to offer somewhat of a public service and still speak to some developing technologies.

Often, we get asked for gift ideas for technology folks around the holiday season. So, I not only included a great "top 10" article, I also quizzed the Keystone team and

included their response.

And, just in time for the Star Wars release, our own David Howard takes a look at the Technology Frontier right now to share with you what is close for business use and what might still only be used in the movies.

10 Top Tech Gifts For 2015

Technology Frontiers

The word frontier can be defined as "areas near or beyond a boundary", and when we think of those who are "frontiersman", we may think of ancient explorers, or the crew of the Enterprise on Star Trek who were exploring "space, the final frontier." These frontiers are new and exciting, but also fraught with risks and unknowns. We have gone through many frontiers in the information technology

Sure, it carries a hefty price tag and doesn't really do much, but this BB-8 droid - based on the character from the upcoming "Star Wars" movie - is so darn cute it's hard to resist. It carries an onboard camera and can be controlled via an app with a bluetooth connection

FREE ASSESSMENT

Not really sure how secure your data is? You've heard all the talk, but really are not sure where to begin? We are willing to help you with that first step.

Every client is as different as their needs. We do not offer a "one solution fits all". We want to discuss your future business goals and your current needs. We want to assist you in getting on the right technology roadmap for your company.

For the next 30 days, we are offering this assessment to you for free. We have a limited number of time slots available, so please don't wait. SECURE your spot now!

Named 'Keystone' after the stone within an arch that holds the structure together, we're founded on the principle that it's our job to serve as the glue that holds critical business processes and support mechanisms in place, securing reliable, effective results.

I would enjoy the opportunity to discuss your IT business needs and how we might be able to assist your company!

industry. Looking back in my life we have had several: the move from mainframes to PCs, from character based operating systems to Windows and Mac graphical user interfaces, from local area network client/server applications to web based applications, and from PCs to tablets and other mobile devices. [Read More](#)

This month instead of highlighting one of our team members and their strengths from StrengthsFinder, the group offered up what tech items or gadgets would excite them if they received them during the holidays!

The list included plenty of wearables, bluetooth speakers, Amazon's Echo, and plenty of drones! I have more and links. [Read More](#)
